Symposium the House of Lords

22nd November 2017

EKTG Definition of eHealth

**This includes:
mHealth
Ambient Assisted Living.....**

The Tallinn Declaration 2017

Stressed the need for better Digital Services
Promises a digital future for Europeans

All member states, including the UK, agreed on common goals for e-government development over the next five years. Smart Cities will

Smart Cities

Will follow the lead....

**The Local Authority of the future –
where the Citizen comes first**

Others will follow on soon!

Smart Cities All Party Group recent meeting here when Seven of the Eight Metropolitan Mayors discussed :

**The Mayoral Challenge Initiatives –
Application of SMART approaches
Address specific constraints**

Smart Cities will

Educate their citizens –
policy makers,
service providers, professionals,
local industry, users, their families
and carers

EKTG Next Steps

Curriculum design for e-health delivery

- **For all stakeholders**
- **At various locations, where you want it**
- **With an excellent Consortium**
- **By various modes of teaching and learning**
- **Building real Innovation for the future**

EKTG are ready!

Developing Digital Transformation of Health and Care for an Ageing Society – The Education Perspective
